Please join the U.S. National Science Foundation for an in-person briefing highlighting the breadth of NSF-funded research on infrastructure that is helping to create an innovative and resilient future. Effective infrastructure can provide a strong foundation for growing the economy, protecting the natural environment and enhancing national security. Achieving these objectives requires the integration of expertise from across all science and engineering disciplines. This interactive showcase will highlight five NSF-funded researchers’ projects that support climate-resilient infrastructure and extreme weather, cyber infrastructure, safe and secure transportation, and the future of the American city.

**Wednesday, July 19, 2023**
**2:00-3:30 p.m. EDT**

Opening Remarks: 2-2:30 p.m.
Interactive Showcase: 2:30-3:30 p.m.

**SVC 203-02**
Capitol Visitor Center (Senate side)
First Street NE, Washington, D.C. 20515

**OPENING REMARKS**
Sylvia Butterfield
Acting Assistant Director, NSF
Directorate for Social, Behavioral and Economic Sciences

**NSF-SUPPORTED RESEARCHERS**

Emily Balcetis
Associate Professor of Psychology, New York University

Joel Conte
Professor of Structural Engineering, University of California San Diego

Mina Sartipi
Professor of Computer Science and Engineering, University of Tennessee at Chattanooga

Lilit Yeghiazarian
Associate Professor of Biomedical, Chemical & Environmental Engineering, University of Cincinnati

Quanyan Zhu
Associate Professor of Electrical and Computer Engineering, New York University

Please contact Amanda Carter (amcarter@nsf.gov) and Chloe McPherson (cmcphers@nsf.gov) to RSVP or if you have any questions.
